News Release

Chairman's interview published in The Worldfolio, a British news agency.

~ What is the Strength of "Made by Japan"? ~

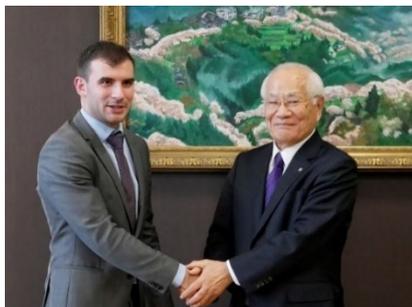

On April 8, Mr. Toshihiro Matsumoto, Chairman and CEO of JESCO Holdings Inc. (headquartered in Shinjuku-ku, Tokyo) had an interview with the British News Agency The Worldfolio (headquartered in London, the United Kingdom), and got published on their website.

The theme of interviews were the strengths of "Made by Japan".

In the article, Chairman Matsumoto talks about the turning point for overseas expansion in early stages, his devotion towards Vietnam, messages for SMEs, and messages that he would like to leave for the next generation.

This article will be posted on The Worldfolio's website and some lines are expected to be used in Newsweek, a leading U.S. weekly magazine. In addition, the Japanese translation and the original article are available from the link below in the <Reference>.

<About The Worldfolio>

Established in August 2011, The Worldfolio is a web-based communication organization that provides content for the production and publication of economic articles worldwide through the media. It covers all fields, including energy, communications, agriculture, tourism, education, finance, IT, and infrastructure. Through both the Internet and print media they provide, pioneers in major industries are grasping the latest trends in the world and impacting the international business environment.

<About JESCO Holdings>

We are developing the EPC ※ business through integration, design, estimation, procurement, construction, and maintenance of telecommunications and wireless facilities. In Japan, we have been engaged in infrastructure-related projects such as ETC, disaster-prevention radio and solar photovoltaic generation. In ASEAN countries mainly on Viet Nam, we have been engaged in infrastructure-related ODA projects such as airports, as well as the construction of many high-rise condominium facilities. On April 11, 2018, we received “the 1st Japan Construction International Award” by the Ministry of Land, Infrastructure, Transport and Tourism, and on April 18 the same year we received “2018 High Quality Construction Award from the Vietnamese Senior Vice-Minister of Construction.
